

Mod2 Inc. has developed features to run Mod2 software on AWS, Amazon Web Services. Running your Mod2 on the cloud is more efficient, faster, and less prone to security and virus issues. You will not need a hardware or a server any longer to use Mod2, and you will be able to seamlessly print to local printers, scan from local scanners, fax, attach, output to Excel, and email using local Outlook.

Please contact our office to schedule a consultation on the details and costs involved.
